UNIVERSITY HILLS NURSERY
Claude W. Davis, Proprietor
470 Delgado Drive
Baton Rouge, Louisiana

Summer & Fall, 1950.

The following plants are offered subject to stock being unsold on receipt of the order. All plants are guaranteed to be true to name and to arrive at destination in good condition. Prices quoted include transportation charges.

TERMS: Cash with order. MINIMUM ORDER: \$3.00.

LOUISIANA NATIVE IRIS

For the past 12 years I have collected the best native irises which I could obtain from the Sabine River to Lake Ponchartrain. Additional good clones have been obtained from crosses between these varieties and from open-pollinated seed. From these plants I am now offering a choice collection of Louisiana native irises, moderately priced for those who wish to get a start with good plants, but who are not interested in buying a variety name. This collection will contain a large Ghenees White, one of the famous Abbeville Reds, several types of Giganticaerulea (tall marsh-land blue), a white Foliosa, a hybrid Foliosa and several purples.

Orders are being booked for shipment when the plants are dormant in July or early August.

PRICE: \$5.00 per dozen, delivered in the United States.

HYBRID DAYLILY PLANTS

These plants were transplanted from the seed-bed to the field in May, 1949. The majority of them have bloomed this season, and they are truly a choice collection of all the colors known to daylilies, including yellow, gold, pastels, bi-colors, "reds", maroon and "pinks." The plants have been grown without crowding and have developed extensive root systems. In my judgement, these plants are one of the best "buys" in the daylily trade. Visitors have pronounced many of them superior to some of the medium to high-priced named varieties.

Plant now for large, flowering clumps in the spring and summer of 1951. Sold only in unlabeled, mixed colors.

PRICE: \$3.00 per dozen, delivered in the United States, or 25¢ each if part of a minimum order of \$3.00.
